

Frontend Web Developer

About Our High Growth Purpose-Driven Company:

Founded in 2011 by a physician and engineers from MIT and Harvard, Podimetrics set out on a mission to Improve patient lives through early detection and prevention of diabetic foot ulcers.

[Podimetrics](#) has since evolved to become a rapidly growing virtual care management company with advanced technology and patient-centered services. Today, Podimetrics **teams** with and provides **solutions** to patients, payers and providers that **eliminate** the health and financial implications of diabetic foot ulceration in **high risk populations**.

We are a **mission driven, financially responsible** enterprise that enables patients to stand on their own two feet and live more independent and fulfilling lives. Our financial viability is directly tied to our ability to help payers and providers solve the complex clinical and financial implications related to serving patients in this high risk population.

ABOUT THIS ROLE:

The Frontend Web Developer is responsible for designing and developing User Experiences crucial to the mission and success of Podimetrics, a care management and medical device company with the leading solution to help prevent diabetic foot ulcers. The Frontend Web Developer ensures seamless onboarding and monitoring of patients by providing responsive, secure and functional User Interfaces and software necessary to support the Care Management, Operations, and Sales teams.

KEY RESPONSIBILITIES

The Frontend Web Developer will be responsible for a wide variety of day-to-day software development initiatives including, but not limited to:

- Participate in or lead User Story workshops to elicit requirements from key stakeholders.
- Design, prototype, develop, test and document responsive, secure and functional Web applications.
- Participate in the entire software development life cycle including release management automation.
- Support the development team by performing code, documentation and procedure reviews.
- Participate in daily standups and provide updates to the team.
- Troubleshoot and resolve reported and detected software issues.

CANDIDATE REQUIREMENTS

In order to succeed in this role, a candidate must be able to work in an Agile environment independently with minimal supervision. The following skills and experience are sought,

- 10 years of web application development experience.
- Ability to work and collaborate remotely.
- Excellent written and verbal communication, including technical writing skills.
- Healthcare experience, working with PHI.
- Expertise with frontend Javascript Frameworks and libraries including VueJS
- Knowledge and experience with Material design and UI frameworks including Vuetify
- Typescript experience is a plus.
- ASP.Net Core experience is a plus.
- Experience developing and integrating with RESTful web services.
- Working knowledge of Git or GitHub code versioning tools.
- Experience developing and deploying solutions to GCP (preferably), AWS or Azure.

Significant opportunities for growth, mentorship, and advancement along with competitive compensation and benefits are available. The successful candidate will embody the following competencies:

- **Honesty/integrity:** Earns trust and maintains confidences, doing what is right while not cutting corners ethically.
- **Accuracy and Detail-Oriented:** Create and review records thoroughly and accurately; don't let errors, omissions, or inconsistencies slip through the cracks.
- **Intelligence:** Learns quickly while demonstrating the ability to proficiently understand and absorb new information.
- **Reliability and Responsibility:** Take ownership and responsibility for operational excellence and contributions to a positive patient experience. Foster confidence from the team by consistently exceeding expectations

Benefits

- Flexible Personal Time Off
